BOSSINI

BOSSINI

FROM **TRADITION** TO **INNOVATION**

Da oltre 60 anni Bossini è sinonimo di qualità in Italia e nel mondo. I clienti possono scegliere all'interno di una gamma straordinariamente ampia di prodotti doccia e rubinetteria. Negli ultimi anni il marchio si è dedicato anche allo sviluppo di un programma di rubinetti completo con varie soluzioni che spaziano dal design classico al moderno. Le panoramiche delle collezioni e dei programmi Bossini elencano tutti i prodotti da offrire ai vostri clienti. Numerosi riconoscimenti internazionali per il design tra cui il German Design Awards 2022 e Archiproducts Design Awards nel 2021 per la collezione Apice.

For over 60 years Bossini has been synonymous with quality in Italy and around the world. Customers can choose from an extraordinarily wide range of shower and mixer products. In recent years the brand has also developed a complete mixer program with various solutions ranging from classic to modern designs. The overviews of Bossini collections and programs list all the products to offer to your customers. Numerous international design awards including the German Design Awards in 2022 and Archiproducts Design Awards in 2021 for the Apice collection

MISSION

“**Lavoriamo ogni giorno per sviluppare tecnologie e prodotti** che soddisfino le esigenze dei nostri clienti, con particolare attenzione al rispetto dell’ambiente”
Leonardo Bossini

La nostra mission è offrire ai clienti soluzioni creative uniche, frutto dell’applicazione di un solido **know-how** e di una grande flessibilità, che caratterizza ogni fase del processo produttivo sempre in armonia con il rispetto ambientale.

- Concept & Design
- Ingegnerizzazione dei Prodotti

- *Product Engineering*
- *Production*
- *Safeguarding the environment*

L'AMBIENTE MERITA SCELTE PRECISE. LE NOSTRE

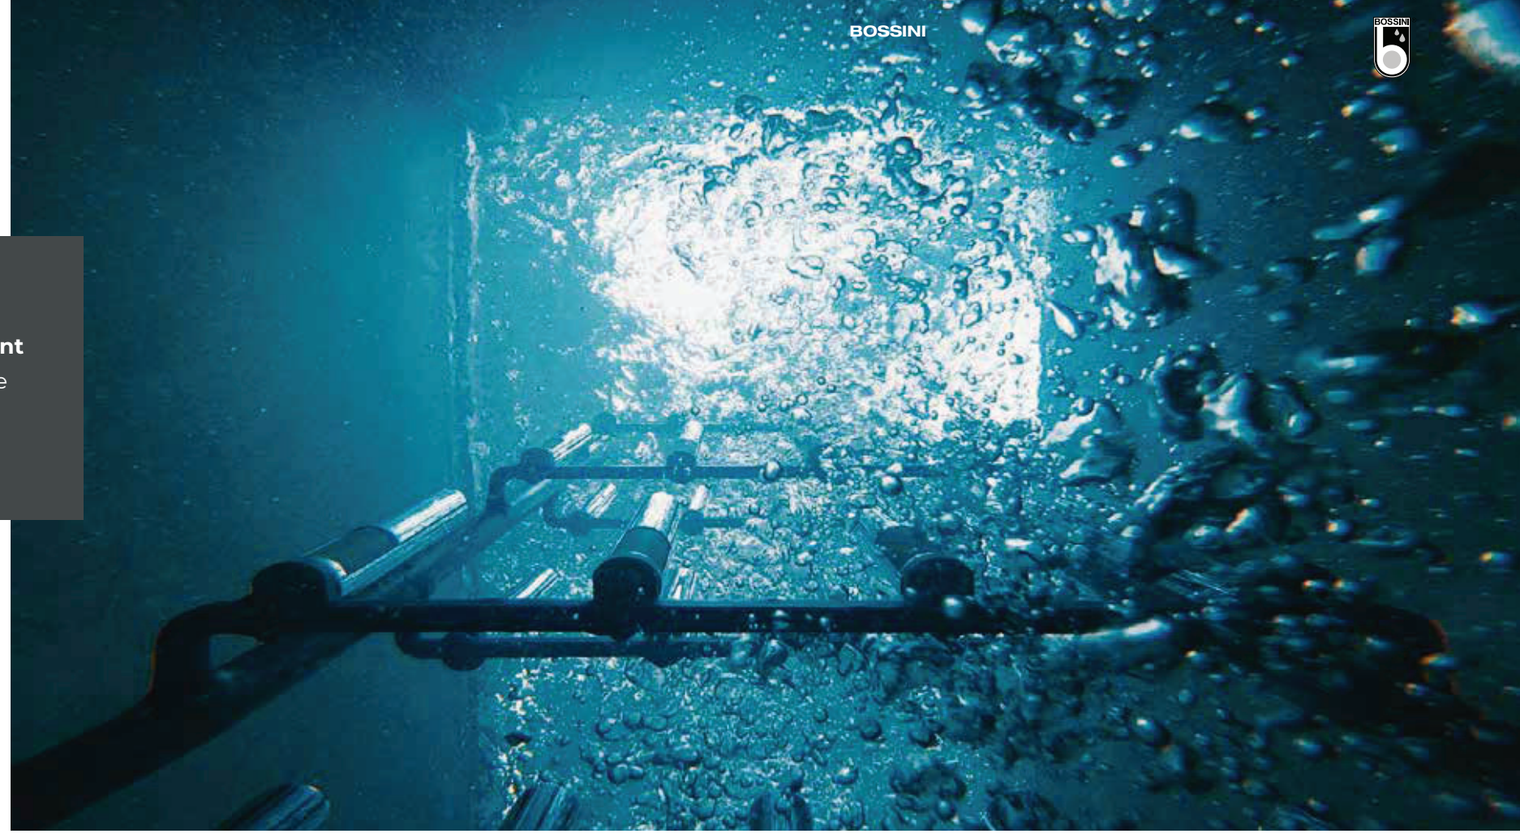

I siti produttivi di Montichiari e Castenedolo, il cui fabbisogno energetico è interamente soddisfatto da impianti di cogenerazione e fotovoltaico, hanno conseguito la certificazione del Sistema di Gestione Ambientale secondo la norma UNI EN ISO 14001-2015.

I due impianti di cromatura qui operanti - uno della plastica ed uno dell'ottone – rappresentano quanto di più evoluto anche in termini di sostenibilità, grazie ad un sofisticato impianto di depurazione e riciclo delle acque a circuito chiuso - ovvero a scarico zero - in grado di rispondere contemporaneamente all'esigenza di una costante qualità del trattamento.

L'ultimo importante investimento fatto da Bossini infatti riguarda l'aver convertito un impianto di **cromatura della plastica all'innovativo processo Cromo VI Free**, completamente privo di Cromo esavalente. Questo dalla fase di mordenzatura, passaggio fondamentale per l'aderenza del rivestimento al prodotto. Una scelta che dimostra ancora una volta come Bossini intenda giocare d'anticipo su un tema vitale: il rispetto per l'ambiente. Ponendosi all'avanguardia persino rispetto alle future normative europee in tema di eco-sostenibilità. Un ulteriore investimento che, sommato ai sofisticati impianti di riciclo e riutilizzo delle acque di trattamento, consente di definirci come azienda GREEN. Il tutto garantendo gli elevati standard tecnici e qualitativi dei prodotti.

The environment deserves precise choices. **Our**

Production sites in Montichiari and Castenedolo, whose energy demand is fully met by cogeneration and photovoltaic systems, were awarded the Environmental management system certificate according to the UNI EN ISO 14001-2015 standard.

The two chrome-plating systems operating here - one for plastics and one for brass – are the most advanced systems even when it comes to sustainability, thanks to a sophisticated closed circuit - that is without discharge - water treatment and recycling system, capable of simultaneously meeting the need for a constant treatment quality.

The most recent major investment made by Bossini lies in converting a **plastic chrome-plating system into the innovative Chromium VI Free process**, *which is entirely free of hexavalent chromium.*
This right from the etching step, a key step for the adherence of the coating to the product. A choice which once again shows Bossini's drive to be a pioneer on a crucial topic: safeguarding the environment.

Becoming a ground-breaker even with respect to European regulations as pertains to eco-sustainability. A further investment which, together with the treatment water recycling and reuse systems, earned us the name of a GREEN company. All this while still guaranteeing high technical and quality standards of the products.

Inborn
sustainability

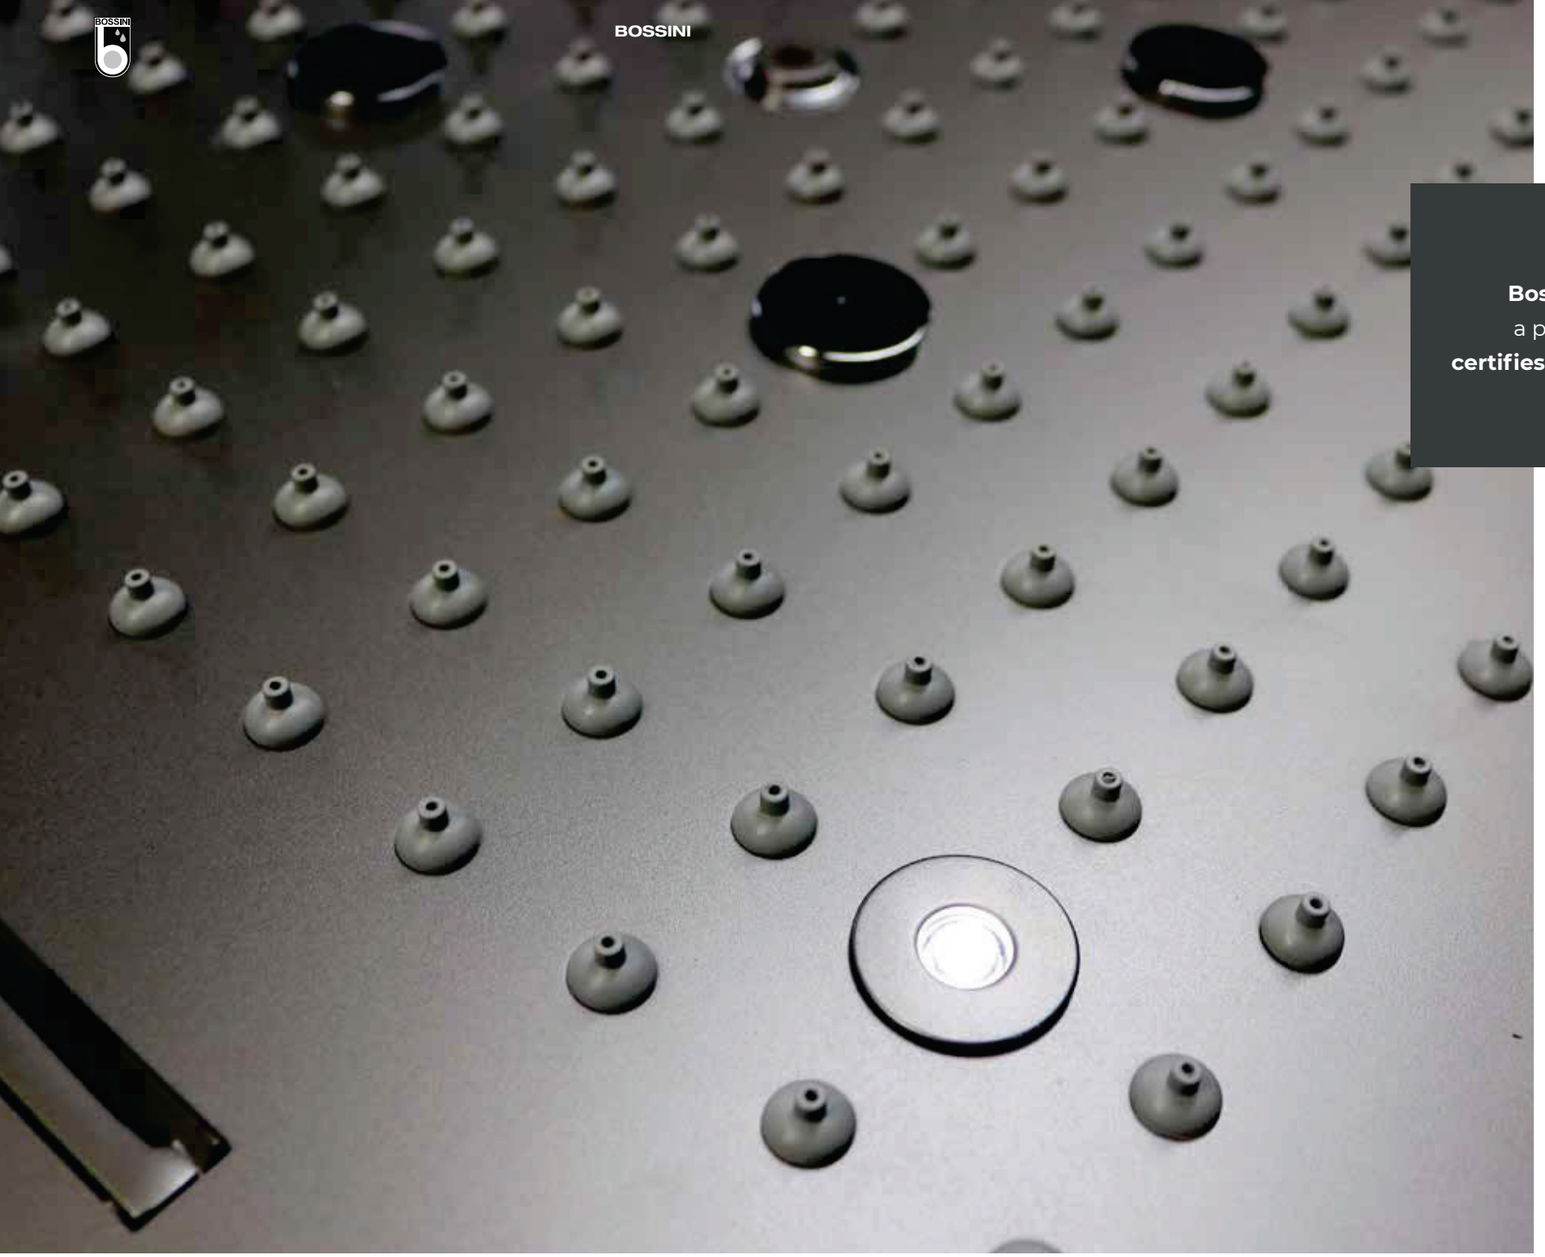

LA SOSTENIBILITÀ
FA PARTE DI NOI

La fondamentale importanza dell'acqua nell'ecosistema globale è diventato un tema di estrema attualità. Evitare lo spreco di un bene tanto prezioso significa ridurre, ora ed in futuro, non solo l'impatto ambientale dovuto al suo consumo, ma anche il costo economico legato all'impiego di energia.

Realizzare prodotti di pregio, sicuri e duraturi ed un concreto rispetto per l'ambiente e la salute. Bossini ha coniugato queste due priorità, mettendo in atto una serie di investimenti finalizzati ad una produzione che sintetizzi design, tecnologia e qualità, in accordo con le norme che tutelano le persone e l'ambiente.

The crucial importance of water in the global ecosystem has become current topic now more than ever. Avoiding wasting a resource that is so precious means reducing, now and in future, not only the environmental impact stemming from water consumption, but also the economic cost relating to energy use.

Creating supreme quality, safe and durable products while tangibly safeguarding the environment and health. Bossini has merged these two priorities, making several investments aimed at a production that combines design, technology and quality, according to the regulations protecting people and the environment.

Bossini today:
a present that
certifies the future

As a matter of fact, Bossini is certified according to the UNI EN ISO 9001/2015, IATF 16949:2016 standard for Quality Management Systems and UNI EN ISO 14001-2015 standard, for Environmental Management Systems, operating in compliance with the highest quality standards.

Bossini products are the result of the combination of applied high technology and the creative ability to promptly adapt to changes. Every component is subjected to strict controls throughout the production cycle steps.
Through an advanced strategy, quality assurance is able to swiftly respond to every market need, providing solutions characterized by a tailor made artisan care and high-tech industrial processes.

BOSSINI OGGI: UN PRESENTE CHE CERTIFICA IL FUTURO

Bossini è certificata secondo le norme UNI EN ISO 9001/2015, IATF 16949:2016 per i Sistemi di Gestione per la Qualità ed UNI EN ISO 14001-2015, per i Sistemi di Gestione Ambientale, operando nel rispetto dei massimi standard qualitativi.

I prodotti Bossini sono frutto della sintesi fra alta tecnologia applicata e la capacità creativa di adeguarsi rapidamente ai cambiamenti. Ogni componente è sottoposto a rigorosi controlli durante tutte le fasi del ciclo produttivo. Garanzia di qualità, grazie ad una strategia evoluta è in grado di rispondere con rapidità ad ogni esigenza del mercato, offrendo soluzioni caratterizzate da un taylor made dalla cura artigianale e dai processi industriali ad alta tecnologia.

STABILIMENTO DI **CASTENEDOLO**

È la sede commerciale, amministrativa ed operativa del Gruppo. I reparti di progettazione e sviluppo dei prodotti e i laboratori si avvalgono delle più moderne tecnologie e dei più avanzati strumenti informatici. Qui operano gli impianti di tornitura, smerigliatura e pulitura dei particolari metallici, gestiti con sofisticate macchine robotizzate che consentono un controllo totale di tutte le fasi di realizzazione del prodotto, oltre alla produzione di tubi flessibili, l'assemblaggio ed il confezionamento dei prodotti finiti.

This is the Group's business, administrative and production head office. The product planning and development departments and the testing laboratories use cutting edge technology and the most recently developed computer tools. This is where the metal parts are cleaned, polished, the hoses are produced, assembly is carried out and the finished products are packed and forwarded. Everything takes place with the use of sophisticated robotized machinery allowing complete oversight in each phase of production.

STABILIMENTO DI **MONTICHIARI**

Nell'insediamento di Montichiari, il cui fabbisogno energetico è interamente soddisfatto da un impianto di cogenerazione e da fotovoltaico, operano i reparti di stampaggio, cromatura, stoccaggio ed assemblaggio di tutti i prodotti di plastica.

Il recente ammodernamento è quello di aver convertito un impianto di cromatura della plastica al processo Cromo Trivalente VI Free. Una seconda implementazione riguarda il reparto di cromatura dell'ottone in Cromo Trivalente. Una scelta di sostenibilità che si somma ai sofisticati impianti di riciclo e riutilizzo delle acque di trattamento.

At Montichiari Manufacturing plant energy needs are met entirely by an in-house cogeneration and photovoltaic system. Here molding, chromium plating, storage and assembly departments supply all Bossini plastic products.

The recent modernization involves converting a plastic chrome plating plant to the Trivalent Chromium VI Free process. A second implementation concerns the brass chrome plating department in Trivalent Chrome. A sustainability choice that adds to the sophisticated recycling and reuse systems of treatment water.

Personalize your bathroom

PERSONALIZZA
IL TUO BAGNO

- Varietà di stili: dal contemporaneo al classico.
- Vasta gamma: prodotti per ogni sala bagno - dal lavabo alla doccia e vasca, fino alle doccia per piscina.
- Finiture: rubinetterie, docce e componenti disponibili in varie finiture.
- Renovation: una linea specifica per le ristrutturazioni dell'ambiente doccia e vasca.

- *Variety of styles: from contemporary to classic*
- *Wide range: products for every bathroom - from the basin to the shower mixer and bathtub, up to the outdoor showers columns*
- *Finishes: Mixers collection, showers and components available in various finishes*
- *Renovation: a specific line for the renovation of the shower and bathtub environment.*

L'altezza ottimale di collocazione dei singoli prodotti si determina in base all'altezza della persona.
Each individual product can be installed and adjusted to suit person's height.
Die optimale Einstellungshöhe der einzelnen Produkten hängt von der Höhe der Benutzer ab.
La hauteur optimale pour placer chacun des produits varie selon la taille de la personne.
La altura ideal de colocación de cada producto se realiza en base a la altura de la persona.
Оптимальная высота расположения отдельных предметов базируется на параметрах человеческого роста.

TECHNICAL FEATURES

CARATTERISTICHE TECNICHE DEI TERMOSTATICI ALTA PORTATA
Tutti i termostatici ad alta portata hanno attacchi da 3/4" e possono essere installati in verticale (con entrata dell'acqua calda e fredda rivolte verso il basso) o in orizzontale (con entrate dell'acqua calda e fredda rivolte verso il lato destro o sinistro). Esistono due tipologie di termostatici: bassa pressione LP (Low Pressure), solo con rubinetti singoli; oppure alta pressione HP (High Pressure), con l'utilizzo di soli deviatori a 2 vie o di una combinazione di deviatori e rubinetti. Una delle caratteristiche principali del sistema termostatico alta portata di Bossini è che funziona in modo ottimale anche in condizioni di bassa pressione, ma solo nei tipi LP a rubinetti singoli le portate sono conformi alla norma EN1287.

TECHNICAL FEATURES OF HIGH FLOW THERMOSTATIC MIXERS
All the high flow thermostatic mixers have 3/4" connections and can be installed vertically (with the incoming hot and cold water directed downwards) or horizontally (with the incoming hot and cold water on the left or the right). There are two types of thermostatic mixer: Low Pressure LP with single taps, or High Pressure HP get by using only 2 way diverters or a combination of diverters and single taps. One of the main features of the Bossini high flow thermostatic system is that it works well even in low pressure conditions, but only LP type with single taps have a flow rate that complies with the European standard EN1287.

THECHNISCHE EIGENSCHAFTEN DER HOCHDURCHFLUSS THERMOSTAT-BATTERIE
Alle Hochdurchfluss Thermostat-Batterie von Bossini haben ¾" Anschlüsse und können sowohl senkrecht (mit Warm- und Kaltwassereingang nach unten) als auch waagerecht (mit Warm- und Kaltwassereingang nach rechts oder links) eingebaut werden. Ein der wichtigsten Vorteile der Hochdurchfluss Thermostat-Brausebatterie liegt darin, dass sie auch bei Niederdruck optimal arbeiten können. Zwei verschiedenen Typen sind erhältlich: LP (Low Pressure) Niederdruck Batterie mit Einzelstoppventilen oder HP (High Pressure) Hochdruck Batterie mit 2-Wege Umstellventilen.

CARACTÉRISTIQUES TECHNIQUES DES MITIGEURS THERMOSTATIQUES
All the high flow thermostatic mixers have 3/4" connections and can be installed vertically (with the incoming hot and cold water directed downwards) or horizontally (with the incoming hot and cold water on the left or the right). There are two types of thermostatic mixer: Low Pressure LP with single taps, or High Pressure HP get by using only 2 way diverters or a combination of diverters and single taps. One of the main features of the Bossini high flow thermostatic system is that it works well even in low pressure conditions, but only LP type with single taps have a flow rate that complies with the European standard EN1287.

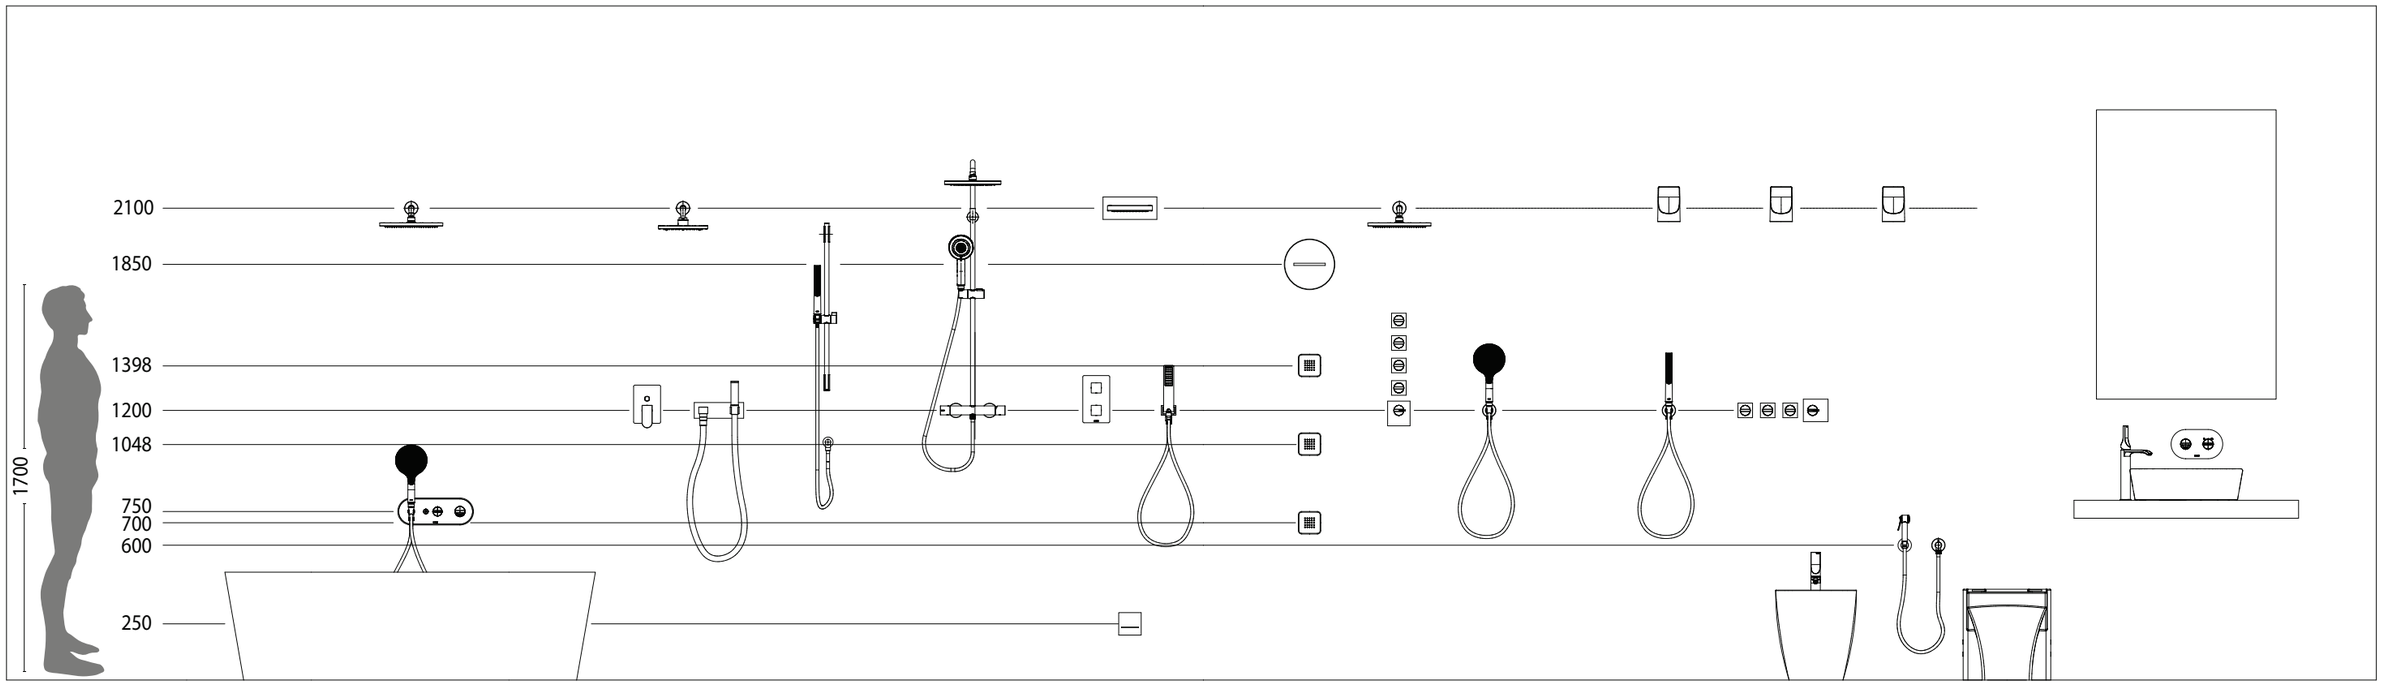

CARACTERÍSTICAS TÉCNICAS DE LOS MEZCLADORES TERMOSTÁTICOS ALTA CAPACIDAD
Todas los mezcladores termostáticos alta capacidad tienen conexiones de ¾" y pueden ser instalados en vertical (con entrada del agua caliente y fría hacia abajo) o en horizontal (con entradas del agua caliente y fría hacia el lado derecho o izquierdo). Una de las características principales del sistema termostático alta capacidad de Bossini es que funciona óptima mente también en condiciones de baja presión. Existen dos tipos de mezcladores termostáticos: baja presión LP (Low Pressure) con grifos simples o bien alta presión HP (High Pressure) con grifos/desviadores de 2 vías.

ТЕХНИЧЕСКИЕ ХАРАКТЕРИСТИКИ ТЕРМОСТАТА ВЫСОКОЙ ПРОПУСКНОЙ СПОСОБНОСТИ
Все термостаты высокой пропускной способности имеют подключение на 3/4" и могут быть установлены вертикально (с подведением горячей и холодной воды снизу) или горизонтально (с подведением горячей и холодной воды с правой или левой стороны). Существуют два типа термостатов: для низкого давления LP (Low Pressure), с вентилями на один выход; либо высокого давления HP (High Pressure), с использованием девиаторов на 2 выхода либо комбинацией из девиаторов и вентилей. Одна из основных характеристик термостатической системы высокой пропускной способности от Bossini, заключается в том, что они работают самым эффективным образом и в условиях низкого давления, но только тип LP с вентилями, что соответствует нормативам EN1287.

L'altezza ottimale di collocazione dei singoli prodotti si determina in base all'altezza della persona.

Each individual product can be installed and adjusted to suit person's height.

Die optimale Einstellungshöhe der einzelnen Produkten hängt von der Höhe der Benutzer ab.

La hauteur optimale pour placer chacun des produits varie selon la taille de la personne.

La altura ideal de colocación de cada producto se realiza en base a la altura de la persona.

Оптимальная высота расположения отдельных предметов базируется на параметрах человеческого роста.

Shower Installation Solutions

Vi proponiamo differenti soluzioni d'installazione da 2 a 6 vie, per facilitare i progettisti nello studio del vostro ambiente doccia.

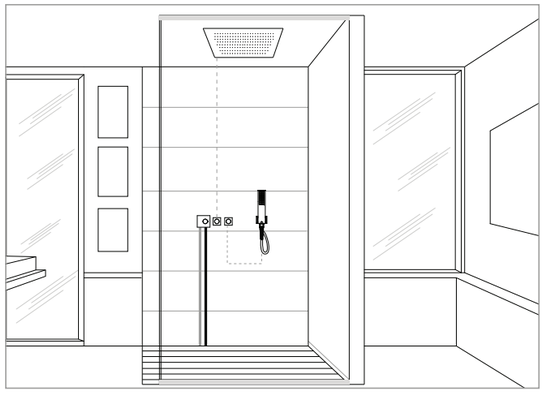

We offer several installation solutions from 2 to 6 ways, to help designers to create your shower space.

Wir schlagen Ihnen unterschiedliche Installationslösungen von 2- bis 6-Wege Anschlüsse vor, um Ihnen die Planung Ihres individuellen Dusch Bereich zu erleichtern.

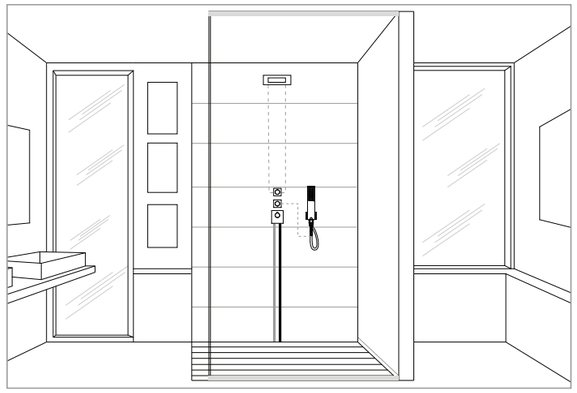

Nous vous proposons différentes solutions d'installation de 2 à 6 voies afin d'aider les projeteurs dans l'étude de votre espace douche.

Os ofrecemos diferentes soluciones de instalación de 2 a 6 vías para ayudar a los diseñadores en el análisis de vuestro ambiente de ducha.

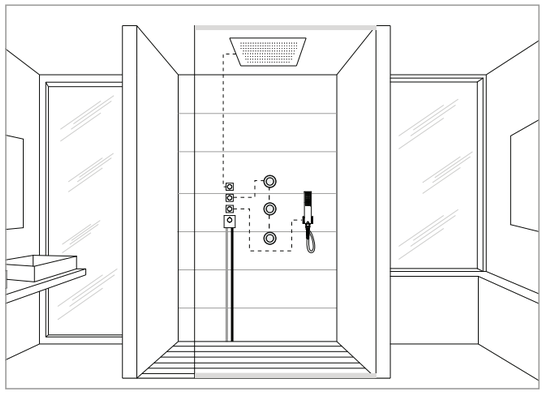

Предлагаем Вам разные варианты установки от 2 до 6 направлений, для упрощения проектирования помещения Вашей ванной комнаты.

MR05 Type - 5.0 L/min - 6.6 L/min

Flow Regulator - Pressure Compensating

Features and Benefits

- Operates as a flexible orifice to provide reliable flow regulation from 15 to 150 psi.
- Noiseless and trouble free operation over many years.
- Press-fit design: no retainer needed.
- Select flow rates help with WaterSense requirements for faucets or showers.

Available Options

Part #	Color	gpm	L/min

Flow Regulating Check Valve - Pressure Compensating

Features and Benefits

- 100% factory tested drip tight operation.
- Easy to insert into the application device.
- Spring loaded plunger: operates in any position.
- Constant flow on pressure range.
- Combines check valve and flow regulator.

Certification

ANSI/NSF® -61-372
ASME A112.18.3M (*Select flow rates)

AVVERTENZE

(I) Avvertenze: il flessibile è concepito per un utilizzo ad acqua corrente e NON per uso con pressione statica. Limiti consigliati per il corretto funzionamento del flessibile secondo la norma EN 1113: Pressione dinamica: 0,1 Mpa ≤ P ≤ 0,3 Mpa (1 bar ≤ P ≤ 3 bar) - Temperatura: ≤ 42°. Il fabbricante è sollevato da qualsiasi responsabilità per rotture o danni derivati da un utilizzo improprio del prodotto.

(GB) Warning: Shower hoses are designed to carry running water. They are not intended to hold static pressure. Suggested limits for the correct hose functioning in accordance with the EN 1113 Norm: Dynamic pressure: 0,1 Mpa ≤ P ≤ 0,3 Mpa (1 bar ≤ P ≤ 3 bar) - Temperature: ≤ 42°. The manufacturer accepts no responsibility for damage caused as a result of incorrect use or installation of the hose.

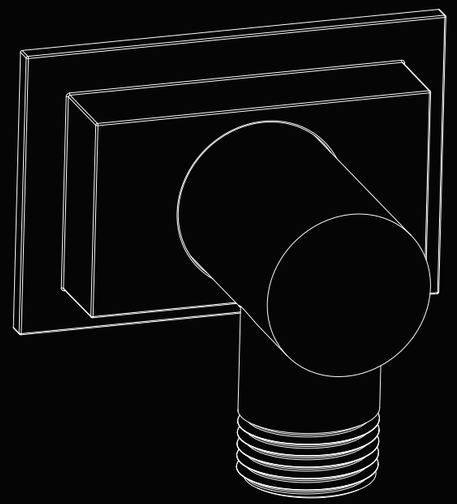

(D) Achtung: Der Brauseschläuch ist nur für fließendes Wasser und nicht für statischen Wasserdruck gedacht. Empfohlene Grenze für die korrekte Produktenleistung laut den Anforderungen der EN 1113 Norm: Dynamisch Wasserdruck: 0,1 Mpa ≤ P ≤ 0,3 Mpa (1 bar ≤ P ≤ 3 bar) - Wasser Temperatur: ≤ 42°. Der Hersteller trägt keine Verantwortung für Brüche oder Schäden, die bei unsachgemäßem Gebraucht verursacht werden.

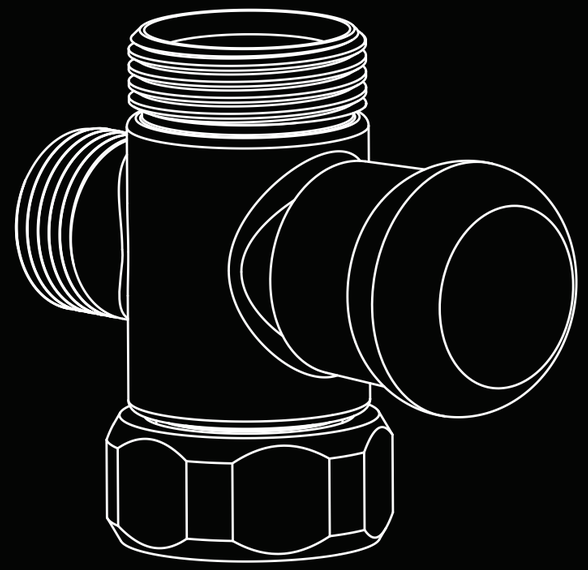

(F) Attention: Le flexible de douche a été conçu pour une utilisation à eau courante. Limites conseillées pour le correct fonctionnement du flexible conformes aux requis de la Norme EN 1113: Pression dynamique : 0,1 Mpa ≤ P ≤ 0,3 Mpa (1 bar ≤ P ≤ 3 bar) - Température: ≤ 42°. Le fabricant n'est pas responsable pour les ruptures ou les dommages provoqués par une utilisation incorrecte du produit.

(E) Advertencias: El flexible de ducha está concebido para la utilización con agua corriente. Límites aconsejados para el correcto funcionamiento del flexible, conformes con los requerimientos de la Norma EN 1113: Presión dinámica: 0,1 Mpa ≤ P ≤ 0,3 Mpa (1 bar ≤ P ≤ 3 bar) -Temperatura: ≤ 42°. El fabricante no asume ninguna responsabilidad para roturas o daños producidos por la mala utilización del producto.

(RUS) Предупреждение: шланг предназначен для прохождения текущей воды, а НЕ для использования под статическим давлением. Допустимые пределы использования для шлангов согласно нормативам EN 1113: Динамическое давление: 0,1 Mpa ≤ P ≤ 0,3 Mpa (1 bar ≤ P ≤ 3 bar) - Температура: ≤ 42°. Производитель не несет никакой ответственности за повреждения и ущерб возникшие вследствие использования шланга не по назначению.
